TIMECODE    DIALOGUE

START TIMECODE 00.00.00 AT FIRST FRAME OF PICTURE

**TEASER**

00.22.29        HAMMOND – Dr. Jackson, Colonel.

00.24.27        O'NEILL – General

00.25.20        DANIEL – The message I got was pretty vague.

00.28.00        HAMMOND – So was the transmission we got from the Tok'ra.

00.30.15        DANIEL (OS) - Say...  
                  DANIEL (CONT) - who was coming?

00.32.04        HAMMOND – No.

00.33.04        O'NEILL – Did they say why?

00.34.20        CARTER – No sir.

00.35.19        O'NEILL – Now see, I—that's rude. I hate that.

- 00.38.17           TECHNICIAN (OS) – Receiving Tok'ra IDC. Opening the iris.
- 00.44.04           O'NEILL – In fact, the Tok'ra are starting to annoy me in general.
- 00.47.24           CARTER – Sir?
- 00.48.06           O'NEILL (OS) – Don't get me wrong, Carter...  
O'NEILL (CONT) – Your dad's great. I love him like a brother. But it's just that  
everytime they show up it seems like it's all kinds of—
- 01.03.04           DANIEL – Yep, that looks like trouble to me.
- 01.13.00           ANISE – The High Council of the Tok'ra sends its greetings.
- 01.16.01           HAMMOND – Welcome. I'm General Hammond. Colonel O'Neill. Dr. Jackson.  
Major Carter...  
HAMMOND (OS CONT) – and Teal'c.
- 01.24.09           ANISE – This is Marnon. You may call me Anise.
- 01.28.29           DANIEL – Anise.
- 01.30.04           ANISE – It means noble strength.

- 01.32.07 DANIEL – Um, I'm Daniel. It means, uh, God is my judge.
- 01.40.16 O'NEILL – I'm Jack. It means... What's in the box?
- 01.52.02 ANISE – These armbands were recently discovered among some ancient ruins on a remote planet.
- 01.57.12 DANIEL (OS) – I don't recognize the symbols. May I?
- 02.00.10 ANISE – The language belongs to a race called the Ataniks. Their existence and demise predates the Goa'uld.
- 02.05.20 CARTER (OS) – Ataniks...  
CARTER (CONT) – I think Jolinar knew about these. They're supposed to give the wearer incredible speed and strength, right?
- 02.12.17 ANISE – Yes. Many thought it was just a myth. Still, the Goa'uld and the Tok'ra...  
ANISE (OS CONT) – have both sought these devices for some time.
- 02.19.12 DANIEL (OS) – Obviously not a...  
DANIEL (CONT) - myth.
- 02.20.27 ANISE (OS) – The Tok'ra...  
ANISE (CONT) – were very excited when I found them.

02.23.21 DANIEL – You found them?

02.24.18 ANISE – My area of expertise is ancient cultures.

02.28.11 DANIEL – Oh, mine too.

02.29.24 ANISE – Yes, I know. We thought the devices would provide our operatives with a great, new physical advantage...

ANISE (OS CONT) – in the fight against the Goa'uld.

02.38.06 O'NEILL – However...?

02.47.07 DANIEL – They don't work for you.

02.49.02 ANISE – Our top scientific minds have researched the technology at length...

ANISE (OS CONT) – To the best of our knowledge, the devices...

ANISE (CONT) – should work. However, something causes them to reject the Tok'ra physiology.

02.59.21 TEAL'C – Your symbiote.

03.01.03 ANISE – That is a likely assumption.

03.02.25 TEAL'C – Then the device will most likely be ineffective on me as well.

- 03.05.12 ANISE – Yes, which is why I brought only three.
- 03.08.12 CARTER (OS) – Uh, I still have a...  
CARTER (CONT) – protein marker left by Jolinar.
- 03.11.13 ANISE – Hopefully that will have no effect.
- 03.14.28 DANIEL – Incredible speed and strength.
- 03.17.01 ANISE (OS) – In fact, according to the inscriptions...  
ANISE (CONT) – they should greatly increase all of your natural abilities.
- 03.23.19 O'NEILL – That's kinda cool.
- 03.25.08 ANISE (OS) – In the interest of the Tok'ra-Human alliance...  
ANISE (CONT) – I expected you would cooperate.
- 03.29.09 HAMMOND (OS) – Couldn't we take some time to learn a little more about...  
HAMMOND (CONT) – these things. Perhaps Major Carter and Dr. Jackson—
- 03.35.01 ANISE (OS, INTERRUPTING) – I had hoped to begin...  
ANISE (CONT) – human trial experiments immediately.
- 03.39.03 O'NEILL – What's the rush?

03.40.17 ANISE – If you are not willing to trust us and...  
ANISE (OS CONT) – participate, I will find...  
ANISE (CONT) – human subjects on another planet.

03.50.15 O'NEILL – Fine.

03.54.19 ANISE/FREYA – Colonel, please forgive the scientist in Anise. She has worked very hard for this. I assure you every safety precaution will be taken... What is your answer?

#### ACT ONE

05.31.27 ANISE – This is a Tok'ra bio-sensor. It will monitor every aspect of your...  
ANISE (OS CONT) – physiological condition.

05.39.26 O'NEILL – Woah. Heh.

05.42.22 ANISE (OS) – You will transmit readings...  
ANISE (CONT) – to this device where they will be recorded for the duration of the experiment.

05.47.27 O'NEILL – Okay.

05.59.08 ANISE – Ready?

- 06.00.10 O'NEILL – As I'll ever be... What's that mean?
- 06.13.27 ANISE – The device is working.
- 06.19.21 O'NEILL – I don't feel like leaping any tall buildings.
- 06.22.22 ANISE (OS) – It may take time for the device to adjust to your body...  
ANISE (CONT) – We believe it was designed this way to gradually give you a chance to adapt to your new abilities...  
ANISE (OS CONT) – In the meantime, feel free to move around and interact with your environment as you normally would...  
ANISE (CONT) – The bio-sensor will transmit readings over significant distance.
- 06.41.21 O'NEILL – Okay.
- 06.48.26 TEAL'C (OS) – Do you...  
TEAL'C (CONT) – still feel no effects from the armband, O'Neill?
- 06.50.28 O'NEILL – No, you know something? I'm starting to think this thing's a crock...  
C'mon, Teal'c, bring it. You're goin' easy.
- 07.04.14 TEAL'C – I am attempting to make physical contact with you, O'Neill. But you are boxing with great proficiency today.

- 07.09.07 O'NEILL – Really? I feel a little stiff... Teal'c?
- 07.38.04 FRASIER (OS) - So...  
FRASIER (CONT) - are you feeling any better?
- 07.39.20 TEAL'C – I will be fine, Dr. Frasier.
- 07.41.13 O'NEILL - Teal'c, I'm really sorry.
- 07.46.15 TEAL'C – You are not.
- 07.49.25 O'NEILL – He's right about that.
- 07.55.19 ANISE – Please squeeze this.
- 08.02.07 O'NEILL – What is it?
- 08.03.05 ANISE – It will measure your strength... Your strength is five times that of a normal human.
- 08.15.20 O'NEILL – So, no increase then, huh?
- 08.20.12 ANISE – Physiology remains otherwise normal.

- 08.22.19 O'NEILL – Well I, uh, I feel good... Three.
- 08.30.05 FRASIER – And uh, you seem to have developed a bit of a sweet-tooth.
- 08.35.05 ANISE (OS) – Your metabolism is increasing...  
ANISE (CONT) – to match the energy your body now requires.
- 08.39.26 FRASIER – You were, uh, going to show me how to read this thing.
- 08.42.18 ANISE – I will. First it is time to increase the number of subjects in the experiment.
- 09.03.11 CARTER – I don't really feel any different.
- 09.06.01 O'NEILL – Just wait...
- 09.16.17 O'NEILL – Hey.
- 09.17.25 DANIEL – Hey.
- 09.21.27 O'NEILL – Don't see anything yet?
- 09.25.07 DANIEL – You're eating a lot.
- 09.29.12 O'NEILL – Unn. Give it time.

- 09.50.06 DANIEL – Did you just read that?
- 09.53.27 O'NEILL – I guess. Don't suppose there's another book around that explains this book.
- 09.59.23 DANIEL – What, what, what reason did Hobbes give for the fall of the civilization?
- 10.05.04 O'NEILL – Failing agricultural infrastructure.
- 10.07.16 DANIEL (OS) – Jack, that's...  
DANIEL (CONT) – unbelievable.
- 10.08.25 O'NEILL – Hey, it's his theory... Want me to read to you?
- 10.40.16 FRASIER (OS) - Sam?
- 10.41.13 CARTER (OS) – Yeah?
- 10.43.16 FRASIER (OS) - What're you doing?
- 10.44.19 CARTER (OS) – Um, I'm just running a few tests on the material the armband's made of.
- 10.48.01 FRASIER – Ah. It's, um, a little dark, don't you think?

- 10.52.01 CARTER (OS) – Is it?... Ow. That’s bright.
- 10.58.29 FRASIER – Yeah. Lights were out.
- 11.03.09 CARTER – I came in, I didn’t even realize it.
- 11.18.11 FRASIER (OS) – Well it looks normal to me.
- 11.20.10 CARTER – I can see in the dark as well as if the light wasn’t on.
- 11.28.11 FRASIER – You’re running a slight temperature.
- 11.29.24 CARTER – A—Anise is monitoring our vitals.
- 11.32.27 FRASIER – Yes, I know.
- 11.34.27 CARTER – You don’t trust her bio-sensors?
- 11.38.00 FRASIER – No, I’m sure her technology is very advanced and very accurate.
- 11.42.02 CARTER – So you don’t trust her.
- 11.46.07 FRASIER – I’d like to run a full blood screen.

12.09.00 ANISE – Very good.

12.13.07 O'NEILL – I'm not even sweatin'. In fact, I think that thing's slowin' me down.

12.17.20 ANISE (OS) – Squeeze this.

12.28.10 O'NEILL – Sorry.

12.35.09 DANIEL (OS) – I mean, it's, it's the most unbelievable...

DANIEL (CONT) – incredible thing I've ever experienced. I mean, I, I've cross-referenced the symbols on the armband a—

DANIEL (OS CONT) –against every written language on Earth in an hour.

12.44.25 ANISE – What did you find?

12.46.09 DANIEL – Uh, nothing, but you see, see, the point is... I can read really fast.

12.53.10 ANISE – Here are my notes on the Ataniks. I thought you might be interested.

12.59.08 DANIEL – You write in a notebook?

13.00.27 ANISE (OS) – My host...

ANISE (CONT) – Freya enjoys the tactile sensation of handwriting.

- 13.24.25 DANIEL – The inscription says with great power comes great responsibility.
- 13.29.01 ANISE – And the ability to affect great consequences.
- 13.33.05 DANIEL – You haven’t speculated in here on why the Atanik became extinct.
- 13.36.22 ANISE – No. My primary concern, up until now, was finding the armbands and then determining how they work.
- 13.51.22 DANIEL – What does that mean?
- 13.59.20 ANISE (OS) – I believe all the armbands have now reached their maximum potential.
- 14.03.29 FRASIER – Anise? Can I see you for a moment?... They all have significantly raised body temperatures.
- 14.19.21 ANISE – They are in no danger.
- 14.21.00 FRASIER – I disagree. Their symptoms are indicative of the presence of a virus.
- 14.25.05 ANISE (OS) – You are correct. My bio-data indicates the...  
ANISE (CONT) – armband released a virus into their systems.
- 14.30.10 HAMMOND – Doesn’t that concern you?

- 14.31.27 ANISE (OS) – It must be how the technology accesses the human physiology. It took a different amount of time...  
ANISE (CONT) – in each individual because of each subject’s unique reaction to the virus.
- 14.41.04 FRASIER (OS) – That’s all speculation...  
FRASIER (CONT) – Major Carter’s blood-work showed a dangerous amount of adrenaline in her system.
- 14.47.07 ANISE – I object to the interference in my experiment.
- 14.49.24 FRASIER – I object to being kept in the dark about the condition of people whose health I am responsible for.
- 14.54.23 ANISE (OS) – Are...  
ANISE (CONT) - you suggesting I would risk their health?
- 14.58.04 HAMMOND – Doctor, we’re seeing some really interesting results. Are you saying that we should discontinue the experiment?
- 15.03.07 FRASIER – Until we know more about the physical effects of this virus, yes. I say we remove the armbands...  
FRASIER (OS CONT) – and we run more tests to make sure that these...  
FRASIER (CONT) – changes aren’t permanent or damaging.

15.14.06 ANISE – General—

15.14.22 HAMMOND (OS, INTERRUPTING) – No, I’m sorry...

HAMMOND (CONT) – If there’s one thing I’ve learned in my time here it’s that there is nothing wrong with a little prudence when dealing with alien devices...

HAMMOND (OS CONT) – Based on Dr. Frasier’s...

HAMMOND (CONT) – recommendation, I’ve decided to stop the experiment temporarily.

15.33.08 CARTER – What?

15.33.14 DANIEL (OVERLAPPING) – Why?

15.33.17 O’NEILL – Why?

15.34.14 HAMMOND (OS) – We’d like to get a better read on ex—

HAMMOND (CONT) –actly what these things are really doing to you.

15.38.04 DANIEL – Well—

15.38.07 CARTER – General...

15.39.09 O’NEILL – I’d rather not do that, sir.

15.41.17 FRASIER (OS) – I think the armbands may be having...  
FRASIER (CONT) – a narcotic-like effect. Wearing them may become addictive. It's just one of the things that I would like to rule out.

15.49.01 HAMMOND – Please, take the armbands off.

15.51.25 CARTER – But—

15.52.19 HAMMOND – Are you refusing to comply with a direct order?

16.10.07 O'NEILL (OS) – Uh...  
O'NEILL (CONT) – little problem here, sir.

16.13.09 HAMMOND – Colonel.

16.14.08 O'NEILL – Having a hard time complying.

## ACT TWO

16.34.03 FRASIER (OS) – We've tried everything...  
FRASIER (CONT) – short of surgically removing their arms.

16.38.15 HAMMOND – We'll hold that option in reserve.

16.40.23 ANISE/FREYA (OS) – You must admit the positive effect is astonishing.

16.43.23 HAMMOND – As long as there’s no downside.

16.47.14 ANISE – There is no evidence of any downside.

16.49.29 FRASIER – Yet.

16.53.03 HAMMOND – Find a way to get those armbands off my people.

16.59.23 O’NEILL (OS) - Teal’c, how much do I have on here?

17.03.25 TEAL’C – It appears to be approximately six hundred pounds, O’Neill.

17.10.27 O’NEILL – Really? Not bad.

17.21.17 TEAL’C – Are you unconcerned because the armband cannot be removed?

17.24.17 O’NEILL – Nope. This is great.

17.29.07 TEAL’C – We will not resume our duties as SG-1 as long as this experiment continues.

- 17.35.21 O'NEILL – Yeah...
- O'NEILL (OS CONT) - well, I'm gonna have to have a little chat with Hammond...
- O'NEILL (CONT) – about that. I mean, we should be usin' these things.
- 18.11.02 FRASIER – Hey.
- 18.12.02 CARTER (OS) – Hey.
- 18.14.21 FRASIER – What're you working on?
- 18.16.06 CARTER – I'm writing a book on worm-hole physics but this damn computer isn't fast enough. When the buffer's full I have to wait for it to catch up.
- 18.23.06 FRASIER – You know we really could use your help.
- 18.26.17 CARTER – You just don't get it, Janet. I don't wanna take it off.
- 18.30.25 FRASIER – Okay, I realize they're making you feel really good—
- 18.34.09 CARTER – Look...
- CARTER (OS CONT) – I have written a thousand page book in under two hours...
- CARTER (CONT) – I mean this is something I've been dying to do but I haven't had the time.

- 18.41.25 FRASIER – Sam—
- 18.42.08 CARTER (INTERRUPTING) – Janet.
- 18.52.01 HAMMOND (OS) – Absolutely not.
- 18.53.14 O'NEILL – Aw c'mon, General, why'd we put these things on in the first place?
- 18.56.11 HAMMOND – We still aren't sure what the long-term effects will be.
- 18.58.24 O'NEILL – Yeah, but we shouldn't be sittin' around wastin' this stuff. We oughta be out kickin' some Goa'uld butt. I mean, look at this... Sorry about that, General.
- 19.16.18 HAMMOND – Colonel, I'm concerned that you aren't in full control of your new abilities.
- 19.21.10 O'NEILL – Well you might be right about that. It's just so damn exciting, sir.
- 19.25.04 HAMMOND – I'm sure it is.
- 19.26.07 O'NEILL – And even if we're not in total control, shouldn't we be out there doin' the damage, instead of in your office?
- 19.32.26 HAMMOND – I'm concerned for your well being, Colonel.

- 19.35.08 O'NEILL – And I appreciate it. And you're the boss. Whatever you say, goes. I just want you to know that we're here for you. Ready to go. Just... Just say the word.
- 19.47.05 HAMMOND – Thank you.
- 19.50.28 O'NEILL – Seriously. Say it. Say the word.
- 16.54.19 HAMMOND – Dismissed.
- 19.55.11 O'NEILL – We can be ready in three seconds—
- 19.56.25 HAMMOND (OS) – Colonel—
- 19.57.08 O'NEILL – Two.
- 19.57.17 HAMMOND – Colonel—
- 19.58.00 O'NEILL (OS) – Hey, we're ready.
- 19.58.26 HAMMOND – Jack, please, just get the hell out of my office.
- 20.05.00 O'NEILL – Yes sir... Hey, Siler.
- 20.12.19 SILER (OS) – (screams)

20.19.14 O'NEILL – Oh crap...

20.36.19 O'NEILL (OS) – It's ridiculous...

O'NEILL (CONT) – It was an accident.

20.39.28 DANIEL – Siler has a broken arm and a concussion.

20.43.09 O'NEILL – He'll pull through. I sent flowers.

20.49.10 DANIEL – You have to admit it's a little scary. I mean I feel like I could do anything.

20.53.17 CARTER (OS) – Well...

CARTER (CONT) - all I know is I'm gonna starve to death. Now I don't know about you guys but I am having some serious protein cravings.

21.03.00 O'NEILL – Steak.

21.04.26 DANIEL – I could go for that.

21.06.25 O'NEILL – Big, red, juicy, meat.

21.11.04 CARTER – O'Malley's, in town.

21.12.13 O'NEILL – Let's go...

- 21.26.00 O'NEILL – Let's eat...
- 21.39.28 O'NEILL (OS) – How high do you think that fence was?
- 21.42.00 DANIEL – Twenty, twenty-five feet.
- 21.43.14 CARTER (OS) – I'd say more like thirty.
- 21.45.27 WAITRESS – What can I get you?
- 21.47.28 O'NEILL (OS) – Uh...  
O'NEILL (CONT) – three of the biggest steaks you've got, with everything, rare.  
Baked potato.
- 21.54.29 WAITRESS – You got it.
- 21.56.18 O'NEILL (OS) – Excuse me...  
O'NEILL (CONT) – That was for me.
- 22.01.05 DANIEL (OS) – Yeah, I'm gonna have three as well.
- 22.03.13 O'NEILL – Four?
- 22.04.11 DANIEL – Four. Four is good. Yeah.

- 22.06.11 CARTER (OS) – Me too. And French Fries...  
CARTER (CONT) – with mine. Oh and uh, a diet soda... I like the taste better... So  
has it occurred to anyone that we're defying a direct order?
- 22.32.10 DANIEL – Well it's not like we haven't defied orders before.
- 22.34.18 CARTER (OS) – Well yeah, but...  
CARTER (CONT) – that was to save Earth.
- 22.36.17 O'NEILL – Earth. Steaks. There's a difference?
- 22.41.10 DANIEL – We'll be back before anyone knows we're gone.
- 22.56.11 POOL PLAYER (OS) - How the...  
POOL PLAYER (CONT) - hell did you do that?
- 22.57.18 CARTER (OS) – You wanna go double or nothing?
- 22.59.15 POOL PLAYER – No, I think I'll cut my losses.
- 23.01.04 DANIEL – Smart move.
- 23.02.11 POOL PLAYER – What're you laughin' at, you geek?

23.06.29 O'NEILL – Geek?

23.14.12 DANIEL – Excuse me?

23.16.02 O'NEILL – Let it go.

23.20.02 DANIEL – No. Not this time.

23.22.12 POOL PLAYER – Yeah? What're you gonna do?

23.34.01 O'NEILL – Well, this is a cliché... Okay.

### ACT THREE

23.58.01 HAMMOND – Right. Okay. I thought the devices were supposed to enhance them physically, not make them stupid.

24.07.24 FRASIER (OS) – You'd have to ask A—

FRASIER (CONT) —nise about that, sir. All I can tell you is that their erratic behavior could be explained by the increase in various hormone levels. You could almost describe it as uh, a sort of intoxication.

24.17.23 HAMMOND – My concern is how do we contain them? If they're that strong and that fast—

- 24.21.02 FRASIER (OS) – The concern is greater than that, sir...  
FRASIER (CONT) – Blood tests show early indication of multiple organ failure. The human body wasn't meant to be put through this.
- 24.32.02 HAMMOND – Are you sayin' they'll die if we don't get these things off them?
- 24.35.07 FRASIER – I believe the key is the virus the armbands use as an intermediary. There's no magic pill that'll combat a virus but there are a few treatments we could try.
- 24.43.18 HAMMOND – But that's no guarantee.
- 24.46.14 FRASIER – No sir.
- 24.53.22 HAMMOND – Thank you, doctor... Can you explain to me why several witnesses put...  
HAMMOND (OS CONT) – you people at a restaurant in town last night?
- 25.10.05 O'NEILL – Sir—
- 25.10.15 DANIEL – Sir—
- 25.10.23 O'NEILL – I can't tell you how—
- 25.11.09 DANIEL (INTERRUPTING) – I can explain that... No I can't.

25.18.11 CARTER – We were very hungry, sir.

25.21.02 HAMMOND – The report says there was a brawl.

25.23.02 O'NEILL – More of a scuffle, sir.

25.25.10 HAMMOND – You're lucky you didn't kill any of those men.

25.27.08 O'NEILL – Nah, we were very careful about that, General.

25.31.22 HAMMOND – What am I supposed to do with you people?

25.34.06 O'NEILL – General, I can't tell you how sorry we are. But, Carter wanted a steak.

25.40.16 CARTER – Actually it was your idea.

25.41.26 O'NEILL – My point is—

25.42.12 CARTER (INTERRUPTING) – sir.

25.42.17 O'NEILL – General, the fact that we were defying orders didn't even occur to us until we were actually defying them.

25.49.07 DANIEL – It’s like the, the, the armbands are having an affect on our ability to make rational choices.

25.53.24 ANISE – General Hammond, I have received a message from the Tok’ra High Council.

25.57.07 HAMMOND – What?

25.57.23 ANISE (OS) – I reported the progress of the...

ANISE (CONT) – experiment and they have made a suggestion.

26.02.18 HAMMOND (OS) – Regarding?

26.03.13 ANISE (OS) – The High Council would like to forward the idea of putting SG-1’s...

ANISE (CONT) – new skills into practical use.

26.08.23 O’NEILL – Yes...sir.

26.13.00 HAMMOND – What are they suggesting?

26.14.07 ANISE – We have just received new information regarding a new class of battleships that Apophis is building.

26.19.06 HAMMOND – Just received?

- 26.21.02 ANISE – Our internal attempt at sabotage has already failed. However, based on our intelligence...  
ANISE (OS CONT) – a special covert team could—
- 26.28.01 HAMMOND (INTERRUPTING) – You’ve known all along.
- 26.30.09 ANISE – Excuse me?
- 26.31.12 HAMMOND – This was the point, wasn’t it?
- 26.34.24 ANISE/FREYA – General, I assure you—
- 26.36.00 HAMMOND (OS, INTERRUPTING) – I assure you...  
HAMMOND (CONT) – I’ve been at this a long time and I know damn well when I’m being manipulated.
- 26.41.10 ANISE/FREYA – I realize how this must look. However, in the interests of the Tok’ra-Earth alliance—
- 26.45.28 HAMMOND (OS, INTERRUPTING) – Don’t give me that load of bunk...  
HAMMOND (CONT) – Right now I don’t think the Tok’ra have my people’s best interest in mind.

26.51.21 ANISE/FREYA – General, if you believe anything, believe this. If Apophis is allowed to complete this battleship...

ANISE (OS CONT) – it will assure his dominance over the Goa'uld...

ANISE (CONT) – your planet, and the rest of this galaxy. I am sure the High Council will be disappointed...

ANISE (OS CONT) – I have downloaded everything we know about the battle—

ANISE (CONT) – ship's construction into your base computer. Hopefully you will review and change your mind.

27.14.23 O'NEILL – General, if I may—

27.15.26 HAMMOND – No you may not...

HAMMOND (OS CONT) – Take them back to...

HAMMOND (CONT) – the lock-up. For what it's worth, I'm ordering you to cooperate.

27.41.00 O'NEILL – Dismissed. Let's have a look.

27.59.07 HAMMOND – So you think we have a problem here?

28.04.08 TEAL'C – This new vessel has several advancements over the Goa'uld motherships we have previously engaged in battle. We must stop its completion.

- 28.12.20           HAMMOND (OS) – I can't send the rest of...  
                      HAMMOND (CONT) – SG-1 on such a dangerous mission knowing their judgment is impaired.
- 28.21.15           TEAL'C – I will go alone, then.
- 28.23.26           HAMMOND – According to the Tok'ra intelligence, the gate on that planet is heavily guarded. I doubt very much even you could make it through.
- 28.30.17           TEAL'C – We must not allow Apophis to complete this vessel.
- 28.32.25           HAMMOND (OS) – Let's say I agree, Teal'c...  
                      HAMMOND (CONT) – Prove to me it isn't a suicide mission.
- 28.46.11           CARTER (OS) – The gate will be heavily...  
                      CARTER (CONT) – guarded but we should be able to handle it. Worm-hole physics dictate that you exit at the same velocity that you enter.
- 28.52.29           DANIEL (OS) – So they'll never know...  
                      DANIEL (CONT) – what hit 'em.
- 28.54.11           CARTER – Exactly. The facility, however, will be more of a challenge.
- 28.57.13           O'NEILL – Can't we just zip in, plant C-4 and zip out?

- 28.59.29 CARTER – Won't do it, sir. The power core of the ship is completely sealed in teranium. That's what we have to take out...
- CARTER (OS CONT) – Now hang on...
- CARTER (CONT) – The power core is linked directly to some kind of liquid cooling system that's based in the facility...
- CARTER (OS CONT) – These pipes here lead into it.
- 29.15.04 O'NEILL – So we zip in, blow the pipes, and zip out.
- 29.17.17 CARTER – The core will overheat and explode. The only problem is...
- CARTER (OS CONT) – there are four shields protecting this restricted area.
- 29.23.28 DANIEL – So?
- 29.25.18 CARTER – So... I see you point... Goa'uld force shields operate on a frequency oscillation principle. If we were moving...
- CARTER (OS CONT) – fast enough, theoretically we should be able to...
- CARTER (CONT) – see the oscillation interval and run right through.
- 29.49.14 O'NEILL – We'll need snacks.
- 30.06.04 TECH – Uhhh.
- 30.27.01 CARTER – Let's go.

30.37.08           TEAL'C – O'Neill.

30.41.13           O'NEILL – Not this time, Teal'c.

30.53.15           TECHNICIAN – Gate's open, sir.

30.54.15           HAMMOND (OS) – Shut it down. Get the blast doors...

HAMMOND (CONT) – open.

30.57.16           TECHNICIAN – I can't, sir. I'm locked out of the system.

31.01.15           HAMMOND – Medical team to the Control Room.

#### ACT FOUR

31.16.05           JAFFA COMMANDER (OS) – Onak, cree!!

32.10.01           O'NEILL – Takes two guys to carry that?

32.12.08           CARTER (OS) – Weapons grade Naquadah is extremely dense... Sir, do you realize  
how many Naquadah reactors a single bar like that could power?

32.22.09           O'NEILL – No.

32.23.03 CARTER (OS) – A lot.

32.23.29 DANIEL – I’ll get it.

32.25.08 O’NEILL – Meet you back here.

32.39.09 CARTER (OS) – Woah...

CARTER (CONT) - sir, is it hot?

32.41.13 O’NEILL – Little bit. You alright?

32.43.25 CARTER – Fine. The force shields should be somewhere around here.

32.55.07 O’NEILL – Heads up... Woah... Five minutes.

33.13.08 CARTER – Right. After the cooling system goes down it should take about ten minutes for the power core to go critical. Gives us fifteen minutes total to get back to the gate.

33.21.00 O’NEILL – Whatever.

33.27.24 CARTER (OS) – Did you get the Naquadah?

- 33.30.24 DANIEL (OS) – Inside...  
DANIEL (CONT) – in the pack.
- 33.33.23 O'NEILL – Good. Let's go.
- 33.35.03 DANIEL – Uh, actually, it's, uh, it's getting kind of heavy.
- 33.46.25 O'NEILL – Daniel?
- 33.50.19 CARTER (OS) – What's going on?
- 33.51.13 DANIEL – I can't move.
- 34.04.17 HAMMOND – The armbands are going to come off on their own?
- 34.07.13 ANISE – The last bits of data transmitted from their bio-sensors before they stepped through the Stargate indicate traces of an antibody.
- 34.15.23 FRASIER – To the virus, that allowed the devices to enhance their speed and strength.
- 34.20.05 ANISE (OS) – I'm afraid we've...  
ANISE (CONT) – solved the mystery of the Atanik's extinction.

34.23.18 HAMMOND – How so?

34.24.14 FRASIER (OS) – The armbands...

FRASIER (CONT) – only work for a limited time, sir.

34.27.19 ANISE (OS) – Once the immunity spread among the Atanik warriors...

ANISE (CONT) – the armbands would be useless. I guess they never solved the problem.

34.34.13 HAMMOND – Which means that SG-1 is likely out there on a planet full of heavily armed Jaffa with an advantage that could disappear at any time?

34.41.05 FRASIER – Yessir.

34.47.11 ANISE/FREYA – General, for what it’s worth, Anise and I are sorry. We were not aware of the mission prior to our arrival here. I do hope SG-1 returns safely.

35.04.14 JAFFA SOLDIER – Hak kree!

**ACT FIVE**

35.12.04 O’NEILL (OS) – Alright...

O’NEILL (CONT) – you got us. Don’t cree.

35.31.08           TEAL'C – It seems my assistance was required after all.

35.35.01           O'NEILL – Yes. Thank you.

35.37.02           DANIEL (OS) – What happened?

35.38.04           CARTER – You passed out. Your armband came off.

35.42.21           O'NEILL (OS) – Alright...

O'NEILL (CONT) - talk later, we gotta move. Teal'c, get Daniel outta here, back through the gate. Carter, with me...

36.19.07           O'NEILL – Carter?...

O'NEILL (CONT) – Ahhhh. Ahh.

37.12.14           DANIEL (OS) – Where are they?

37.16.04           TEAL'C – They should have been right behind us. Continue on, Daniel Jackson.

37.38.21           CARTER – Sir? Colonel!

37.46.17           O'NEILL (OS) – Ugh. Uhh...

O'NEILL (CONT) – I should've brought more snacks.

- 38.00.25 CARTER – I don't think that would've helped.
- 38.04.16 O'NEILL – One-fifty-six.
- 38.13.09 CARTER – Sir, you've gotta get out of here.
- 38.15.23 O'NEILL – So do you.
- 38.18.25 TEAL'C – I am not leaving, Daniel Jackson.
- 38.22.01 DANIEL – Well I'm not suggesting we should...  
DANIEL (OS CONT) – There is no way in there to help them.
- 38.27.00 TEAL'C – No.
- 38.44.17 DANIEL – Ten minutes after that C-4 goes this whole mountain is gonna explode.
- 38.49.01 TEAL'C – I am aware of that.
- 38.53.08 DANIEL – So the fact that we're staying is based on a completely informed decision.
- 38.58.28 TEAL'C – It is.
- 39.01.00 DANIEL – Yeah, just making sure.

39.10.05 CARTER (OS) – Sir...

CARTER (CONT) – Sir, there’s no time.

39.22.12 DANIEL – Here goes.

39.35.12 CARTER (OS) – Did you see that?

39.36.25 O’NEILL – Let’s go. Carter, forget that. Leave it.

39.45.29 TEAL’C (OS) – The shield is down.

39.51.00 O’NEILL (OS) – Come on, let’s go! Move! Move! Move! I thought I told you guys to get back to that...

O’NEILL (CONT) – gate.

39.55.22 DANIEL (OS) – Yeah, Teal’c wouldn’t leave.

40.04.13 CARTER (OS) – Less than a minute.

40.09.29 TEAL’C – Down!

41.29.05 O’NEILL (OS) – Just remember...

O’NEILL (CONT) – I retired. You wanted me back.

41.33.18 HAMMOND (OS) – Colonel, are you all okay?

41.35.27 DANIEL – I think so.

41.37.06 CARTER – We will be.

41.38.20 TEAL'C – I am very well, General Hammond.

41.41.21 HAMMOND – What happened?

41.43.28 O'NEILL – The damn armbands fell off is what happened.

41.46.16 ANISE – I am sorry.

41.48.21 HAMMOND – Were you successful in destroying the ship?

41.50.21 TEAL'C – Indeed we were, General Hammond.

41.52.05 HAMMOND – Good. Report to the Infirmary.

41.54.12 O'NEILL – Uh, General, sir?... About the obviously impending court martials, I'd like—

- 42.01.10           HAMMOND (OS, INTERRUPTING) – You were all under...  
HAMMOND (CONT) – the influence of an alien technology, Colonel. That’s a pretty solid defense.
- 42.07.08           O’NEILL – Even so, I—I’m sorry.
- 42.11.08           CARTER – Me too.
- 42.12.20           DANIEL – Me three.
- 42.17.21           TEAL’C – I have no need to apologize.
- 42.20.25           HAMMOND (OS) - Teal’c...  
HAMMOND (CONT) – was actually following orders.
- 42.25.03           O’NEILL – Of course he was.
- 42.26.26           ANISE – You left the armbands behind.
- 42.29.19           CARTER (OS) – We...  
CARTER (CONT) – had other things on our mind.
- 42.31.11           ANISE/FREYA – Understandable. Colonel, Anise and I both hope we can work together again in the future.

42.39.07

O'NEILL – Both of you?... Can't wait for that.
